Further Considerations:

- WINDOWS 10 Home is not recommended as this is not compatible with the school network and students will not be able to print
- Students and parents should consider transport and carrying options of their device. This may include;
 - A backpack with netbook/laptop compartment
 - A soft/hard cover
- Touchscreen and 2-in-1 netbooks/laptops are becoming more common. These should be considered in relation to your educational pathway.
- Consider the ergonomics of your device for your intended educational use, including factors such as the weight, size and durability of your device.
